Amendments to the Claims

This listing of claims will replace all prior listings of claims in the application.

Listing of Claims

- 1. (Cancelled)
- 2. (Currently Amended) Container according to elaim 1 claim 40, wherein the layer is formed from a polymer selected from the group consisting of polypropylene (PP), polyvinyl chloride (PVC), polystyrene (PS), polyamide (PA), and polyethylene terephthalate (PET), or the like.
- 3. (Currently Amended) Container according to claim 4claim 40, wherein the layer is provided with a coat of lacquer on one or both sides.
- 4. (Currently Amended) Container according to $\frac{1}{2}$ to $\frac{1}{2}$ wherein the container wall is flexible.
- 5. (Currently Amended) Container according to $\frac{1}{2}$ to $\frac{1}{2}$ wherein the connection of the blank with itself is prepared by heat and/or pressure.
- 6. (Currently Amended) Container according to claim 4claim 40, wherein the connection of the blank with itself is formed along an overlap region in particular extending in the longitudinal direction of the container.
- 7. (Currently Amended) Container according to claim 4claim 40, wherein the opening edge is bent or rolled round without the material changing its properties.

- 8. (Currently Amended) Container according to claim $\frac{1}{2}$ the container wall comprises two or more layers, each of the layers being transparent.
- 9. (Currently Amended) Container according to claim to the selected from the group consisting of PP, oriented PP (coextruded or lacquered), polyethylene (PE), PET, PET (lacquered), PA, and oriented PA (lacquered), or the like.
- 10. (Currently Amended) Container according to claim 1 claim 9, wherein thean inner layer is formed from a polymer selected from the group consisting of PP, PVC, PS, PA, and PET, or the like.
- 11. (Currently Amended) Container according to claim 40, wherein the layers are laminated.
- 12. (Currently Amended) Container according to $\frac{1}{2}$ to $\frac{1}{2}$, wherein two or more layers are coextruded.
- 13. (Currently Amended) Container according to claim to the unshaped blank is strictly two-dimensional to be processed more easily.
 - 14. (Cancelled)
- 15. (Currently Amended) Container according to claim ± claim 8, wherein the two or more layers are joined in a permanent perfect junction.
- 16. (Currently Amended) Container according to claim 1claim 40, wherein one of the layers, in particular a central layer, is an elastic, yet permanently ductile and after the shaping dimensionally stable layer.

- 17. (Currently Amended) Container according to claim 1 claim 40, wherein at least one inner layer is liquid tight and one of the further layers a further layer is gastight.
- 18. (Currently Amended) Container according to claim ± <u>claim 40</u>, wherein outer and /or inner layers are formed as connection layers at least in the overlap region.
- 19. (Currently Amended) Container according to $\frac{1}{2}$ to $\frac{1}{2}$ wherein edges of the layers are fluid tight.
- 20. (Currently Amended) Container according to claim <u>+claim 8</u>, wherein at least one of the layers is provided with a print.
- 21. (Currently Amended) Container according to claim lclaim 20, wherein the print is resistant to rubbing.
- 22. (Currently Amended) Container according to elaim 1 to 1 to 20, wherein the print is provided on one of an inner side of the an outer layer, and outer side or an inner side of the central and/or a central layer, and an outer side of the an inner layer.
- 23. (Currently Amended) Container according to elaim 4claim 40, wherein for the generation of heat for the connection in the overlap region, at least one of the layers is ultrasonic absorbent.
- 24. (Currently Amended) Container according to claim 1claim 20, wherein the print is printed before the layers are laminated.
- 25. (Currently Amended) Container according to claim to the layers is itself a laminate.

- 26. (Currently Amended) Container according to claim lclaim 40, wherein the closed end is formed by connecting lower end sections of the wall.
- 27. (Currently Amended) Container according to $\frac{1}{2}$ Claim 40, wherein the closed end comprises a bottom insert.
- 28. (Currently Amended) Container according to claim 1 claim 27, wherein the bottom insert is formed from a transparent material.
- 29. (Currently Amended) Container according to claim tclaim 40, wherein the material is transparent and coloured.
- 30. (Currently Amended) Container according to claim \pm claim 20, wherein the print is printed on an outer side of the container in case of a one-layer material.
- 31. (Currently Amended) Container according to claim 1 claim 20, wherein the print is printed onto an outer side of the container, which comprises in case of a multilayer, PE-based material, which is possibly prepared by coextrusion.
- 32. (Currently Amended) Container according to elaim $\frac{1}{2}$ to wherein the material is impact resistant and $\frac{1}{2}$ resistant to puncturing.
- 33. (Currently Amended) Container according to claim to the container has a cross-section selected from the group consisting of circular, approximately quadrangular, in particular square, oval, bean-shaped or approximately and polygonal cross-section.
- 34. (Currently Amended) Container according to $\frac{1}{2}$ to $\frac{20}{2}$, wherein the print has a three-dimensional effect.

- 35. (Currently Amended) Container according to elaim $\frac{1}{20}$, wherein the print is or has a hologram.
- 36. (Currently Amended) Container according to claim lclaim 20, wherein the print leaves open forms a control window on the wall.
- 37. (Currently Amended) Container according to claim to the the food has been taken out at least partially removed from the container.
- 38. (Currently Amended) Container according to claim $\frac{1}{2}$ claim $\frac{40}{2}$, wherein the opening edge is bent to the outside at an angle of 90° or more relative to the rest of the container wall.
- 39. (Currently Amended) Container according to elaim $\pm claim 40$, wherein the opening edge is partially and/or in places continuously formed.
- 40. (Currently Amended)—Container according to claim 1
 Container for receiving food, having a wall comprising at
 least one layer, the container comprising a withdrawal opening
 with a bent opening edge and being closed at its end opposite
 the withdrawal opening, at least the container wall being
 formed from a two-dimensional blank which is connected with
 itself for forming a continuous container wall, wherein the
 container and the container wall are at least partially formed
 from a transparent or translucent, fluid tight material which
 can be shaped for forming the container and which is
 dimensionally stable after having been shaped, wherein the
 container and in particular the material are stable at least
 in the temperature range of -50°C to +120°C.

- 41. (Currently Amended) Container according to $\frac{1}{2}$ claim 40, wherein the container can be stacked and unstacked.
- 42. (Currently Amended) Container according to claim lclaim 40, wherein at least one layer is formed as a heat insulating layer.
- 43. (Currently Amended) Blank for the manufacture of a container according to elaim 1claim 40.
